Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given by Mr. Christian Schuster during a telephone interview on November 25, 2009.

The application has been amended as follows:

In the Abstract:

Line 4, after "target system", delete "1".

Replace Claim 1 with the following:

-- 1. (Currently Amended) A ~~method of diagnosing~~ method ~~a system,~~ comprising the steps of:

performing in a batch a plurality of diagnoses selected from the group consisting of a trap operation diagnosis for diagnosing operational conditions of a plurality of evaluation target steam traps in a client's evaluation target system, a fluid leakage diagnosis for diagnosing leakage of fluid from respective portions of an evaluation target piping in the evaluation target system, a system improvement diagnosis for diagnosing

need or no need of system improvement in the construction of the evaluation target system, and a maintenance improvement diagnosis for diagnosing need or no need of improvement in a maintenance system currently adopted by the evaluation target system;

inputting results of the plurality of kinds of diagnoses performed in a batch to a diagnosing computer system and causing ~~this~~ the diagnosing computer system to perform data generating operation based upon the inputted diagnoses results according to an aggregating program, thereby to generate comprehensive evaluation data for reporting in batch results of the plurality of kinds of diagnosis performed in a batch to a client; and

reporting in a batch, with the comprehensive evaluation data, to the client the results of the plurality of kinds of diagnoses performed;

wherein in response to the input of results of the trap operation diagnosis, the comprehensive evaluation data includes reporting on an economic advantage obtained through reduction in trap-passed steam loss by replacing or repairing all the evaluation target steam traps, the trap-passed steam loss being calculated based on the results of the trap operation diagnosis;

wherein in response to the input of results of the fluid leakage diagnosis, the comprehensive evaluation data includes reporting on an economic advantage obtained through reduction in fluid leakage loss by repairing leaking portions in the entire evaluation target piping, the fluid leakage loss being calculated based on the results of the fluid leakage diagnosis;

in response to the input of results of the system improvement diagnosis, the comprehensive evaluation data includes reporting on an economic advantage obtained through improvement in a system construction found by the system improvement diagnosis; and

in response to the input of results of the maintenance improvement diagnosis, the comprehensive evaluation data includes reporting on an economic advantage obtained through improvement in the maintenance system found ~~needing improvement~~ by the maintenance ~~system~~ improvement diagnosis. --

Replace Claim 3 with the following:

-- 3. (Currently Amended) The system diagnosing method according to claim 1, wherein in the trap operation diagnosis, operational conditions of a plurality of steam traps selected from the evaluation target steam traps are diagnosed; and

wherein in a calculation, in the diagnosing computer system, of the trap-passed steam loss for all of the evaluation target steam traps based on the results of the trap operation diagnosis, this calculation is effected deductively in the diagnosing computer system, based on the results of the diagnosis for said plurality of steam traps and information relating to a ratio between the number of said plurality of steam traps and the total number of the evaluation target steam traps. --

Cancel Claims 5-29.

Reasons For Allowance

The combination as claimed wherein a diagnosing method comprising in response to the input of results of the plurality of kinds of diagnoses performed, the comprehensive evaluation data includes reporting on an economic advantage obtained through reduction in trap-passed steam loss by replacing or repairing all the evaluation target steam traps, the trap-passed steam loss being calculated based on the results of the trap operation diagnosis; reporting on an economic advantage obtained through reduction in fluid leakage loss by repairing leaking portions in the entire evaluation target piping, the fluid leakage loss being calculated based on the results of the fluid leakage diagnosis; reporting on an economic advantage obtained through improvement in a system construction found by the system improvement diagnosis; and reporting on an economic advantage obtained through improvement in the maintenance system found by the maintenance improvement diagnosis (claim 1) is not disclosed, suggested, or made obvious by the prior art of record.

Fujiwara (US 2002/0052716) discloses a system and method for supporting sales and maintenance activities of steam traps by a seller of the traps to a customer (Abstract, lines 1-2). Fujiwara discloses inputting diagnostic result data, estimating steam loss, and estimating monetary value and replacement cost (Fig. 4). However, Fujiwara does not disclose estimating an economic advantage obtained through improvement in a system construction found by the system improvement diagnosis and

estimating an economic advantage obtained through improvement in the maintenance system found by the maintenance improvement diagnosis.
